Navionics Mobile App

I tested this feature and was impressed to see the app draw exactly the route I would have chosen in a matter of seconds.. Navionics (22 99 per year) is worth the extra subscription fee Use the free weather tool for sailors offering real-time high resolution data in a six day forecast.. Navionics Mobile App Download Updates ToNavionics Mobile App Download Updates ToAfter that an annual subscription (22.. Navionics features include a full navigation window offering everything you would expect for following a route, the ability to create and store sonar logs with compatible instruments, and autorouting.. You cant hide created marks, which can clutter the screen, created marks do not show their names on the chart and when creating a route for racing, it is not possible to return to the same mark twice you cannot place two waypoints in exactly the same location.. The app includes tidal data displayed as current arrows and tide bars Tidal height bars do the same but also depths on the chart beneath will increase and decrease with the changes in tide.

Plotter sync allows sharing of waypoints and routes between the app and compatible Raymarine plotters.. 99 per year) must be paid to maintain Navionics features and download updates to charts.. Bear in mind that without Navionics you can create markers and routes but there is no way to activate or follow a route.
