

[Volume Mismatch On Songs In Traktor Pro](#)

The screenshot displays the Traktor Pro software interface with four tracks loaded. The tracks are:

- Modern Matters** by Yotam Avni (Perfude to Dybbuk), 130.00 BPM, -04:32 remaining.
- Silicone Harness** by Datura Dilema (Pleasure Instruments), 131.00 BPM, -04:43 remaining.
- Oscillate** by Paula Temple, 130.00 BPM, -02:10 remaining.
- Sampler - Loops** (4 loops), 130.00 BPM.

The interface shows various controls for each track, including gain, filter, and FX. A track list is visible at the bottom, listing tracks with their respective artists, BPM, keys, and ratings.

#	Color	Cover Art	Title	Artist	Remixer	BPM	Key	Rating	Comment
7	Blue	[Cover Art]	Silicone Harness	Datura Dilema	Original Mix	131.000	Bm	★★★★	4/4, Hypno, Bells, Tool

I installed an iTunes update (the one before last) and all of a sudden no sound.. Hello,I'd been using Traktor Pro 2 with a Denon MC6000MK1 and MacBook Pro without issue for 2 years.. When I got it home, I got sound but could only control it from the master volume.. Any suggestions would be greatly appreciated Geof

However, I prefer Traktor and was really getting into it (I enrolled ddt's Traktor course--fantastic!) One more thing, I set up preferences as suggested: (Yes) External controller (no) External Mixer and the rest.

No sound at all in that config When I said yes to external mixer I got the uncontrolled volume I described earlier.. Slides and cross fader didn't work Then I thought it was a hardware issue MK1 was discontinued so I took the plunge and ipgraded to MK2 when I saw Traktor mapping was available.. [Volume Mismatch On Songs In Traktor Pro Full](#)[Volume Mismatch On Songs In Traktor Pro Download](#)[Volume Mismatch On Songs In Traktor Problems](#)[Volume Mismatch On Songs In Traktor Pro 2](#)[Volume Mismatch On Songs In Traktor Pro Free](#)This topic has 5 replies, 3 voices, and was last updated 3 years, 7 months ago by.. Checked everything Even tried using a mac desktop with pro 2 on it Nothing Assumed it was a hardware issue and I took the MK1 for repair.

Installed Serato, which came with MK2 and it worked flawlessly I don't mind exploring Serato as its good to be as well rounded as possible.. Installed new Mapping, plug in MK2, same deal Volume controlled only with master, no slides or cross fader.
